With 2 way calling from the outside camera, you will be able to see and speak to your visitor and verify their identity before letting them into your house.

Advance intercom system with a difference, not only you can monitor your front door and talk to your visitors like you would with a standard system, with this system all installed monitors or audio phones can talk to each other and all monitors and audio phones have total control including opening all types of electric door and gate

locks (the system also provides 12v for the locks or dry contacts for gate openers).

The system also supports a connection of up to 4-door stations using a 4-way interface board, or a mixture of door stations and security camera's (CCTV camera's), 4 door stations or 4 security camera's allowed or a mixture of both totalling up to 4, imagine being able to monitor anywhere within your premises, indoor or outdoor using CCTV camera's (play grounds, the yards, indoor rooms, granny flats, store room, use your imaginations as the list of places are endless).

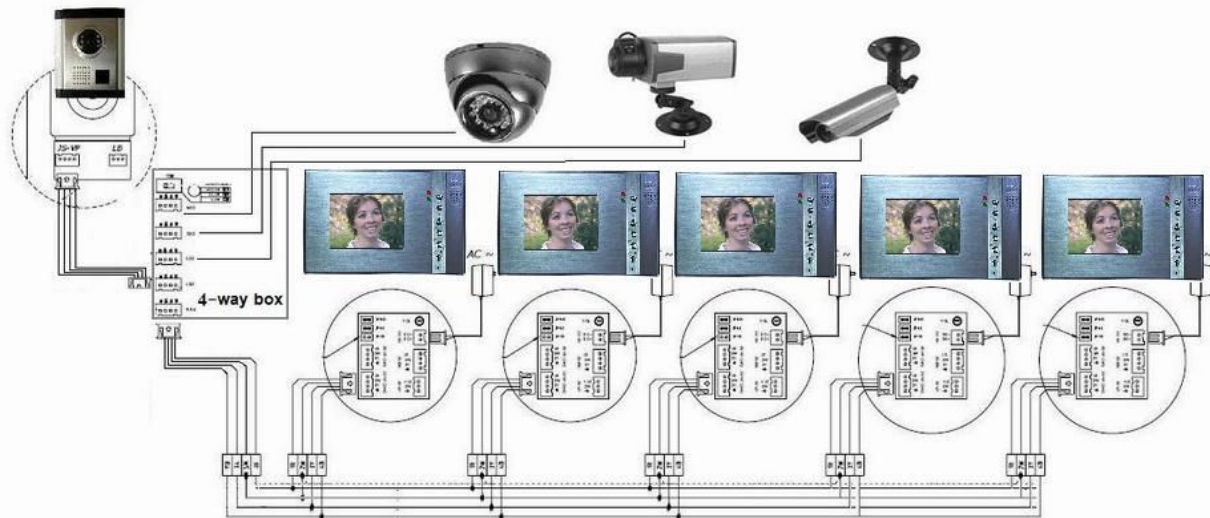

Operation for Intercom:

When the system is connected with multi Indoor monitors, intercommunications is available, Intercom calling can be started by any indoor monitor by pressing the intercom button, the other monitors will ring, other monitors can take the call by pressing talk.

Operation for Multi Door Stations (Cameras):

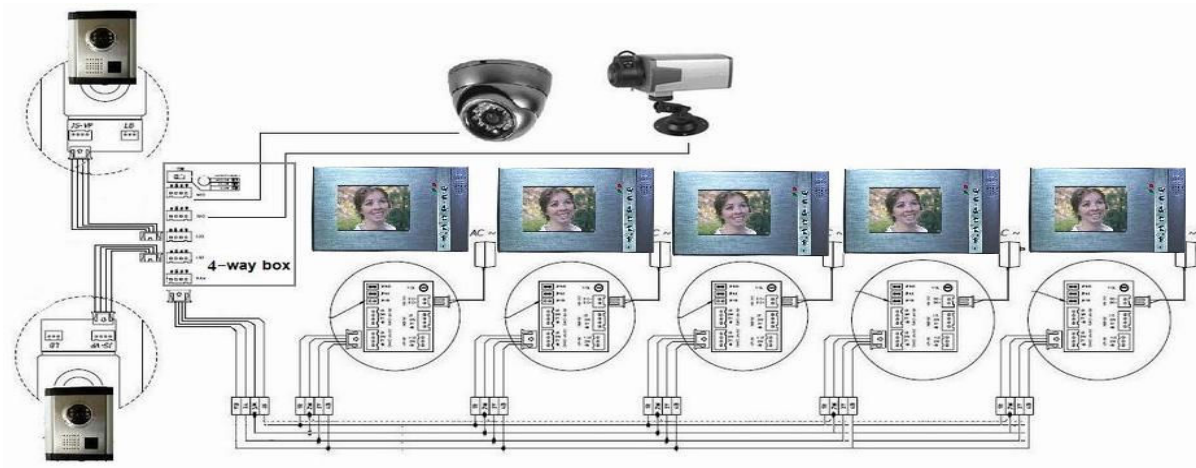

When a Door Station calls, the indoor monitor will display the view of the calling door station automatically and communication is available after pressing the talk button.

The Indoor monitor can monitor each and every door station (Camera) in turn. When monitor button is pressed camera 1 is displayed, press monitor again will rotate to camera 2, press again and camera 3 will be displayed (if installed) pressing again will go to camera number 4.

7 Colour wide screen TFT-LCD surface mount.

Crystal clear picture: The CCD camera and the latest technology of digital imaging guarantees a sharp crystal clear picture

Night vision capability: The outdoor camera has 6 illuminating LED for night viewing

Touch screen!

OSD Menu selections: The on screen menu allows you to hear and choose from 15 welcoming tunes and adjust the volume and adjust the scene mode. Choice of languages: English/German/French/Polish.

Intercommunication: communications between monitors if more then 1 installed.

Upgradeable to 5 monitors and 3 Audio phones: The system can handle 4 extra monitors and 3 audio phones

Multi door stations: The system is designed to connect to 1 or 2 door stations but using an interface 4-way board you can install more door stations.

Security: You can connect and monitor 3 CCTV Security cameras (compatible with most cameras') using a 4-way board. We do have these boards in stock.

Gate-Door opening: The system allows for door release of 12VDC or dry contacts present at the gate's end (no need to run extra wires from the inside).

Weatherproof metal door station: Attractive Stainless steel face with Aluminium trims weatherproof outdoor station that is recessed in.

Cable: The system requires and uses 4 core screened cable RVVP for distance of up to 30 meters, 10 meters included in package. If the distance is greater than 30 meters and for up to 300 meters a SYV-75-3 (RG 59) coaxial cable is required.

PACKAGE CONTAINS:

1 x 7" Master TOUCH SCREEN monitor with build-in image recorder (Dimensions 255x160x30mm)

1 x Mounting bracket and screws

1 x Outdoor CCD camera unit (Dimensions 160x 130mm)

10 meters cable for connecting monitor to the camera

Instruction manual

Additional monitors without image recorder (to cut the cost of the system!)) can be added to the master monitor.
